Performance Measure 1

Performance Measure 3

No children were re-interviewed.

Performance Measure 5

Performance Measure 6

Performance Measures 2 & 4

Follow up Survey To measure Family Support, Child Well-being and Resources Utilized March 23 – December 31, 2005

In the last reporting period of this contract period there were **80** interviews of children alleging felony child maltreatment. Of those interviews, **45** children were served between the ages of **0 – 5** (56%).

Those 45 children are members of 32 families that were followed up with after their child's interview. **20 of those families were** available (63%) for the follow up survey. Of the 12 families not available:

- 4 had ACCESS/CPS involvement (children removed)
- 3 did not return phone calls
- 2 were out of our jurisdiction/out of state
- 2 moved
- 1 disconnected

The results from the 20 families were as follows: (regarding Post-Survey question #6), since your child's interview at MDIC, describe the effect on their well being....

- 69% (14) described their child's well-being as positive
 - "Emotionally supported at the Center and they have begun to talk about a lot more in counseling"
 - "Our child was very comfortable and going to MDIC took a huge burden off them"
 - "Doing fine at home and school"
- 21% (4) described their child's well-being as neutral
 - o "Our child feels safe but now worry about other victims"
 - o "They are glad they told but now wonder why the suspect is not in jail"
- 10% (2) had negative outcomes due to the disclosure/investigative process at MDIC since their family has now had to move because of the allegations and the outcome of the investigation has gone nowhere.

Responding to Post-Survey question #8, utilizing resources since the MDIC interview, **11 out of the 20 families had participated in some type of resource(s):**

- The majority participated or was planning on entering counseling for the child and family (6), HOPES (4), PEACE (2), PCOE child care resources/referrals, Crisis Resolution Center, ACCESS, Family Law Facilitator's Office.
- 11 of the 20 families took a First 5 Baby Kit home.
- Victims of Crime Applications were discussed at every interview.

Responses to Post Survey question #9 regarding how parents felt after their child's interview were as follows:

- Somewhat to very comfortable 65% (13)
- Somewhat to extremely uncomfortable 25% (5)
- Neutral or not ready to say (2)
 - "It felt very honoring to have so many professionals present for our child"
 - "The staff made us feel very comfortable in an uncomfortable situation"
 - o "I felt better equipped to deal with the situation "

Responses to Post Survey question #10 regarding how their **child/ren felt after their interview** were as follows:

- Somewhat to Very comfortable 80% (16)
- Somewhat to extremely uncomfortable 10% (2)
- Other (2) due to not wanting to speak on their child's behalf and another did not want to say since her son was the alleged perpetrator.
 - "My children really connected to the interviewer"
 - "I was so surprised that my daughter talked and she came out of the interview smiling"

Data that speaks most directly to the outcomes at MDIC:

- As a result of involvement in the MDIC process, children's trauma is reduced and the families report that they feel supported.
- MDIC continues to work on sustaining the team, which in turns sustains the MDIC program to benefit child victims in Placer County.

Placer MDIC Sustainability

- DDA Suzanne Gazzaniga at the San Diego Child Maltreatment Conference
- Several other trainings offered through MDIC both national and statewide to include Huntsville, Alabama (Knox, Bjorn, DeGracia, Verhagen) and the Statewide MDIC Summit in Sacramento
- 4th try at Legislation
- Lincoln Community Foundation Grant
- Roseville Grant highest ever
- UAIC
- PLEA meeting setting ground for support
- Child and Family Mental Health Advocate

Lessons learned

- Children and families are having a positive experience at MDIC
- Most of our referred cases continue to be child sexual abuse
- Follow up to be tried through the Child and Family Mental Health Advocate
- Team continues to sustain despite huge personnel changes
- Change in personnel requires a lot of work and training
- Began to track in-home versus out of home abuse cases
- Questionnaire needs to be changed 0-3 or different scale
- Better to follow up with families sooner
- To discuss our audit
- Learning Conversations should be every six months for MDIC
